

School Maritime Museum of the Ambroz Haračić Secondary School, Mali Lošinj

From Idea to Realisation

Presentation by Lidija Kosmos and Aldina Burić

Translation: Saša Jerala, Alenka Kovačević, Daniela Mužić

August, 2021

About the Project: *School Museum of Maritime Affairs and Studies*

- **Team members:** Lidija Kosmos, prof.; Aldina Burić, prof., Jelena Bralić, Principal
- **The aim of the project:** to preserve the cultural heritage of the island of Lošinj (the history of the island is closely related to the history of maritime affairs and studies) and present it to the public.
- **Implementation of the project:** The work on the project started after we had signed a co-funding agreement with the Ministry of Tourism (Funding Program: Vocational and Art School Projects aimed at Promotion and Empowering Tourism-Related Professions 2018) in April 2018.
- After receiving the funds from the Ministry of Tourism, we acquired four museum showcases and have exhibited various collections in them.

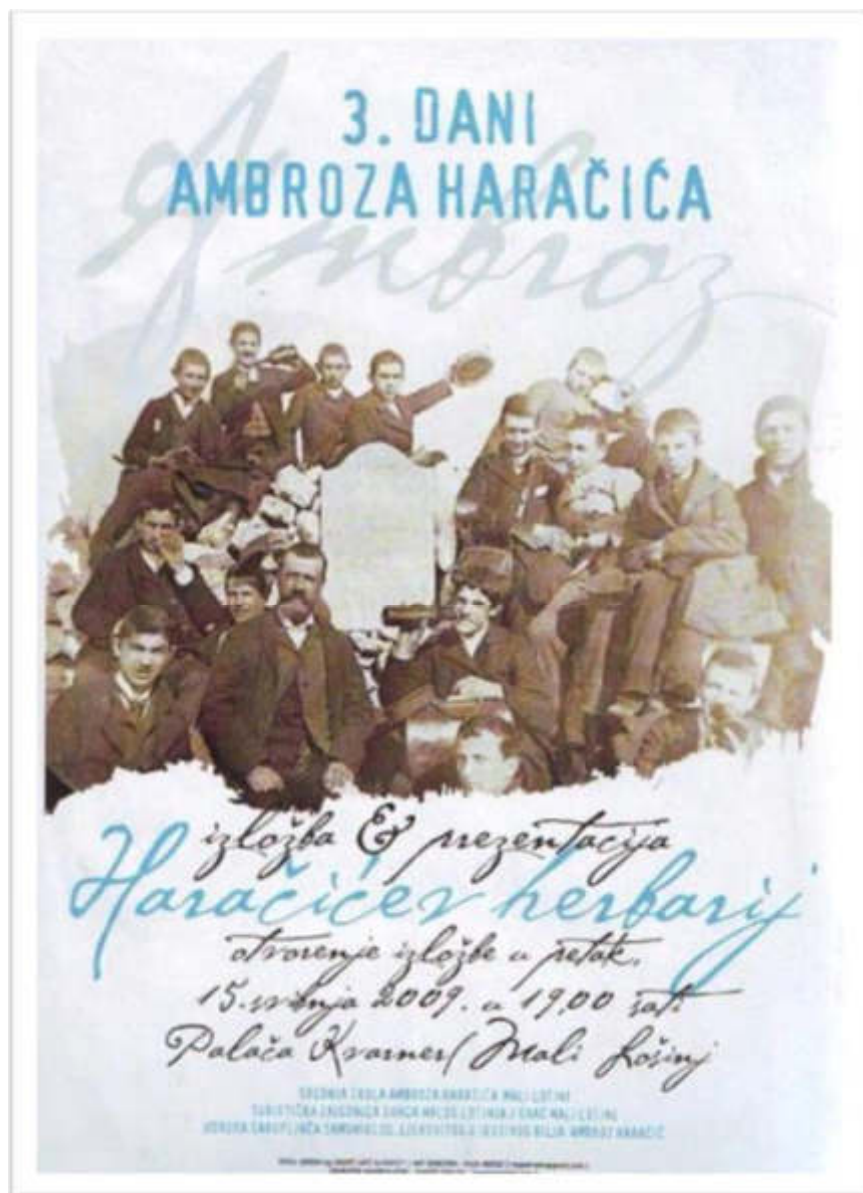

Notes from the Past

- The town of Mali Lošinj has not only a rich history of maritime affairs which culminated in the 19th century but also the history of the unique maritime school founded by the Austrian authorities in 1855.
- **Unfortunately, the city of Mali Lošinj, despite its rich maritime tradition advertised in numerous tourist brochures, has no maritime museum where visitors could get acquainted with the significant part of the island's past, tradition and culture.**
- The Ambroz Haračić Secondary School is the heir to the former Lošinj maritime school. The school inherited many artefacts and various historical sources (meteorological, nautical and astronomical instruments from the 19th and 20th century, ship models, engine parts, books, photographs, archive documents etc.).
- For years our school has been conducting various projects with the intention of preserving the cultural heritage of Mali Lošinj as well as its history closely related to the history of maritime affairs and studies.

Project ”*Conserving the Tradition and Exploring the Local History of Mali Lošinj*”

- Project supervisor: **Lidija Kosmos**
- **2005:** Start of the project;
A new extracurricular activity:
young historians
- **2007:** Launching of *The Ambroz Haračić Days* by Mali Lošinj Tourist Board;
Young historians organize the exhibition and presentation
”*Ambroz Haračić (1855-1916)*”

"Ambroz Haračić Days"

Project ”*Maritime History Sparks*”

- Project supervisors: **Arlen Abramić**, prof., **Aldina Burić**, prof., **Vlaho Stražičić**, prof.
- 2010/11 cooperation on Lošinj Tourist Board project *Lošinj Sails Around the World* — making of nautical charts with the famous Lošinj sailing and steamships’ routes
- 2011/12 exhibition of restored ship models in the school hall
- 2012/13 taking part in setting the exhibition on maritime studies in The City of Rijeka Museum
- 2014/15 cataloging all the instruments used for teaching or navigation, including descriptions and modes of use
- 2015/16 cataloging the instruments; some of the instruments were exhibited as part of the project *Lošinj Sails Around the World*
- 2017/18 permanent exhibition – educational posters on *Lošinj Sails Around the World* project
- 2016 and 2018 co-organization of *Museum Night* with The Lošinj Museum

Students involved in the "*Maritime History Sparks*" project holding navigational instruments from the school collection.

Students researched the use of the instruments, the time until they were used in navigation and which contemporary instruments replaced them.

The Erasmus+ project – *COSMOS*

Connection of School, Museum and Open Space

The aim of the Project:

- collaboration between schools with school museum
- create a platform/website for school museum

Partners:

- Ginnasio Gian Rinaldo Carli, Koper, Slovenia (applicant organisation)
- BRG Kepler, Graz, Austria (partner organisation)
- Srednja Škola Ambroza Haračića, Mali Lošinj, Croatia (partner organisation)
- Convitto Internazionale Paolo Diacono, Cividale del Friuli, Italy (partner organisation)

Exhibition "*Views of Nature*"

Regional Museum, Koper, Slovenia, 19/8/21-16/10/21

- The exhibition is all about nature with many stuffed animals and physics and chemistry instruments
- Main idea: A. von Humboldt's „*Views of Nature*”
- Included some instruments of the school collection, brochures and book concerning Ambroz Haračić's work, a twig of Alep's pine and wild onion from our Island.
- The school also participated in panel making for the exhibition

Our School Building

- The image of our school is symbolically linked to the maritime past. The building was built in the shape of navigating bridge in 1975. Round windows, distinctive fence shapes, resemblance to a hull and space in which, as in a ship's cabin, every centimeter is used, all reveal the maritime design style.

Old School Building

Maritime school was founded by the Austrian authorities; from 1881 until 1975 school building was located in the city harbour

Staffroom in the old maritime school building in the 1970s

Where we are currently with our museum project

- During the 2021 we have been preparing the school museum catalogue:
 - the school museum history
 - list and pictures of the instruments and other exhibits
 - explanation of how the exhibits were used
- **We have been constantly getting new exhibits from our ex students!**
